

## New Look

- With the updates to Wiki Central we are presenting a new look for the homepage.
- New header reflects the recent changes made to the UCO.edu homepage, and the University brand.
- Removal of logo allows for focus to be on the content of the page, with more room for reading and editing.

## Improved Auto Save

- Wiki Central automatically saves your work to a draft while you are adding or editing a page.
- With the recent update, a message near the 'Save' button shows the time of the latest auto-save.
- If something goes wrong, retrieve the saved draft easily from the dropdown menu under your name.
- You can read more about drafts in the Official Confluence [Documentation](#).

## Charts

- The Chart macro presents a sophisticated new look.
- Below are some example charts displayed on a Confluence page.
- The (Confluence) [documentation](#) shows you how to add the macro to your page and choose different formats and types.

## Gallery

- Use the Gallery macro to display a set of pictures on a page.
- Now you can include or exclude individual pictures, or simply display all the images at once.
- Choose pictures from the current page or another Confluence page.
- Take a look at the [documentation](#) for help on these and other options.

## Page ordering

- One of the most popular feature requests is now a reality — Wiki Central allows manual page ordering.
- You can choose the order in which wiki pages are displayed.
- Use a dynamic tree view to drag and drop your pages into the right position.
- Page order is reflected in all tree views for a space or a page family, including the PageTree macro and exports to PDF, HTML and XML.

## Dynamic menus and simplified screen design

- Drop-down menus replace tabs and links.
- Grouping of functions is more intuitive.
- Features are more visible than before
- A cleaner screen design lets you focus on the page's content.
- It's simpler than ever to edit a page.
- There is more space for entering text.

## Introducing the Widget Connector

- Now you can embed multi-media content from other web sites into a Wiki Central page. Bring your wiki page to life with Google Gadgets, videos, slide shows, Twitter messages and more. Simply type the word '{widget}' and give it the web address of the content you want to embed.
- Gadgets: Google Gadgets.
- Videos: YouTube, MySpace Video, Google Video, Episodic, Vimeo, Metacafe, blip.tv, Viddler.
- Photos and images: Flickr, Skitch.com.
- Micro-blogging: Twitter, FriendFeed.
- Documents and presentations: SlideShare, SlideRocket, Scribd, presentations on Google Docs.

## Upgraded Rich Text Editor

The upgrade brings many improvements to the Rich Text Editor and is a big step along the way to a great WYSIWYG experience.

- You can now use Safari to create and edit Confluence pages.
- The styles dropdown list now illustrates the format of each style, such as 'Heading 1', 'Heading 2' and so on.
- Tables are easier to insert and edit.

## Enhanced User Profiles

Confluence's enhanced user profiles area has been augmented to incorporate Confluence 3.0's new community-based features and to improve the overall user experience.

- User profiles now allow users to enter 'structured' information about themselves, which can be used by Confluence's community-based features.
- Each user's profile view shows a list of their own recent activities, such as page or blog post updates, changes to their profile information and status updates (described below).
- A summary of each user's profile information is displayed in a 'profile sidebar' on the right-hand side of pages within their personal space and their blog posts too. The profile sidebar appears on pages based on the default Confluence theme.
- Take a look at our documentation for more details on the enhanced [user profiles](#) feature.

**About Me** [Edit](#)

I'm a Technical Writer at Atlassian. I started working at Atlassian back in December 2008 and focus mainly on documenting new features for Confluence. In my spare time, I enjoy participating in traditional Indonesian 'gamelan' orchestra groups. This is one of my favourite instruments - the 'reong':
